EDUCATION

Indian Institute of Information Technology (IIIT) Dharwad, Dharwad, India — Expected Jul 2028
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.23 / 10.0

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, C++, SQL
Backend: Node.js, Express.js, REST APIs, OpenAPI, Zod, JWT, Supabase Auth, NextAuth.js, Prisma ORM, Socket.IO, caching, rate limiting
Databases: PostgreSQL, MongoDB, Firebase Firestore
Cloud and DevOps: Docker, GitHub Actions, CI/CD, Vercel serverless, AWS (EC2, S3), Nginx
Frontend: React.js, Next.js, TanStack Start, HTML5, CSS3, Tailwind CSS
Tools and Core CS: Git, GitHub, Postman, Linux, Turborepo, Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

AI Web Development Intern, InAmigos Foundation (IAF), Remote — Jul 2026 – Aug 2026

- Prototyped a **Figma** design with UX flows for **6 sections** of an NGO website: donation, volunteer registration, impact showcase, testimonials, campaigns, and events.
- Delivered a live **4-page website** (Home, About, Services, Contact) for a real organization within a **2-month** internship, leveraging AI-assisted generation tools.

PROJECTS

Verdiqy, Competitive Programming Training Platform — GitHub | Live Demo
React, TypeScript, TanStack Start, Node.js, PostgreSQL (Supabase), Codeforces REST API, Gemini API

- Engineered a **Codeforces API** ingestion layer that respects the **1 request per second** limit through request batching and background-refresh caching, avoiding HTTP 429 errors while fetching up to **1,000 submissions** per call.
- Designed a PostgreSQL schema for profiles, practice sheets, and mistake logs with **Row Level Security** and JWT-based Supabase Auth for per-user data isolation; added a sheet builder over a **12,000+ problem bank**.
- Aggregated contest schedules from **4 platforms** (Codeforces, AtCoder, CodeChef, LeetCode) into one calendar, and implemented profile comparison that matches solved problems in **linear time**.
- Integrated a hint-only **AI Mentor** (Gemini API) with prompt guardrails and **3 escalating hint tiers**, plus a scraping pipeline that returns the top **12 solution videos** for each problem.

Novix UI, React Component Library and Design Platform — GitHub | Live Demo
React, TypeScript, TanStack Start, Nitro, Zod, Tailwind CSS, Radix UI, Vercel

- Migrated a client-only single page app to **streaming SSR** on **Vercel serverless** (Nitro, Node.js 22), reaching a time to first byte under **120 ms** across **72+ documentation routes** and a **1,380+ element** gallery.
- Resolved circular route imports that left route objects undefined on the server by extracting **3 shared modules**, and removed the extra **HTTP 307 redirect** on every gallery request through schema-validated search parameters.
- Published **2 npm packages** (@novix-ui/react and @novix-ui/cli) plus a token-driven theming system that supports dark mode and custom brand themes across **8 design systems**.

OPEN SOURCE AND ACHIEVEMENTS

- **Vercel Turborepo (merged PR 14060):** diagnosed stale cache hits between staging and production builds, and resolved them by updating the hashing engine for Remix inference (**4 packages**) and the Nuxt environment-variable wildcard.
- **p5.js (3 accepted PRs):** corrected negative divisor handling in the vector remainder function (9170); stopped shuffle from mutating typed arrays, with **26 unit tests** passing (9186); automated TypeScript declaration generation for npm packaging and CI releases (9192).
- **GSSoC 2026:** secured **28th place globally** among **43,000+** contributors, contributing to **49 repositories**.
- **ECSoC 2026:** placed **286th worldwide** (Tier-1 Elite) with a leaderboard score of **620**.
- **Google Student Ambassador:** conducted **5+ workshops** for **200+ students**; selected to present at Startup Mahakumbh 2025.

COMPETITIVE PROGRAMMING

- **LeetCode:** rating **1700+** with **700+ problems solved** in arrays, graphs, dynamic programming, trees, and binary search.
- **CodeChef:** **3-star** rated.
